Description

As per the client's comment, we need:

1. If the selected flight is from GDS then only the Book button will show. Other than Galileo, the Ticket button will work as book and ticket(automatically)

2. If the selected flight is from LCC then only the Ticket button shows (Auto ticketing and deduct from credit balance).

As per the current flow when we disable the permission the ticket button will not show for LCC. Attaching screenshot for reference.
