The Hotel description and the facilities shown in room details page for Dotw is not taken from DB.The data is taken from CDN path "http://113.193.253.130/cdn/DotwXml/".The description is shown exactly as it is displayed in CDN XML file.

Added "." instead of "," between facilities .

- File amentiy coming now.png added

- File Facility issue.png added

From Facilities Table of [3otolatstaticdata], values should take when use offline hotel data is true , if not it should take from CDN.

Now in GIATA , the facilities are not showing, Only amenities are displayed

Make sure like B2C the display of facilities is done like "." , update the same in B2B.

check cax hotel id 40861. "GERMANIA", location munich.

Bring Headings of each Facility as display, check How B2C is done, make same for B2B
