<b>Description</b>			
<b>Requirment : To bring admin side Flight + Hotel Booking</b>			
<b>Things need to do</b>			
1) Bring Flight + Hotel search option			
make sure we have Modify search option in flight + Hotel.			
Keep the search option same as B2C - refer otolat.com.kw			
also Modify search refer Otolat.com.kw.			
Keep the modify search in the left side - dont make it on top			
Once flight results obtained and selected a flight next search must go for Hotel			
and choose the Hotel from result page and proceed to FLIGHT + HOTEL itenary page			
In Pax Page ensure the options Add passenger , select from saved member exist.			
Make sure Baggage selection exist for travel fusion and other related providers.			
Proceed to Payment page and here we should have option to enter Instant markup and Instant discount.			
Show the ticket / voucher together in single page.			
If flight ticket confirmed and hotel failed show the status accordingly ( same vice versa )			
<b>Notifications required</b>			
1) For flight make sure we have			
a)Booking success / booking failed received to admin user			
b) ticket success / ticket failed received to admin user			
2) For Hotel we have Booking success or Booking failed received to admin user			

## Agency wise concept

In agency wise concept - If we create a travel agent and provide credit balance , make sure the balance is deducted from his credit account once a ticket and hotel booking is confirmed. The total amount including instant service charges must be reduced.

if an agency has done credit / deposit management - in such case the added amount will initially go to deposit balance. so first deposit balance must be reduced if a flight + Hotel is booked/ ticketed

The updated all information must be reflected in Account summary report and Sales report.

Like usual sales report of B2C, in B2B also same report should reflect but should have instant markup and instant discount additionally.

## Transaction Queue report

Additionally bring an option in Online Booking management >> Flight + Hotel Bookings

All the flight + Hotel Bookings must go under this

And make sure we have the status is coming same as current flow of B2C F+H Booking

Bring with price and with out price check box in TQR

Also email ticket and print ticket in TQR
