Description			
Make sure the city insertion is working properly, example when searched with Roomxml (HSR) for dubai NO results is coming, please fix. Also Dubai City is onlu working for GTA, No result for DUBAI , please check such cases			
Need results properly for all individual api for all major cities, like DUBAI , LONDON, ISTANBUL, KUWAIT, ETC.

In table the hotel data and city are mapped properly.. The issue is that we gave 3 api for user (eg: admin add 3 api for MasterAdmin then in search panel that 3 apis(eg:1,2,3) are shown. And also autocomplete is working Based on these 3 api. Suppose we select one city which support 1 and 3 api but in search panel we select 2 nd api, which is not support the city then will show no result in result page.. This is handddled in clent side. When we select one city and api then proceed, check whether the city support the api,if not show one pop up(selected city does not support selected in api)
