Description

Please fix the following issue:

1.In hotel arabic result page, location details in arabic is shown empty..if arabic location details field is empty then show it from english location details

2. in arabic result page description and facilities are taken from cdn path..in this case if we have arabic description and facilities show the corresponding data or else show the english description and facilities..take data from cdn if we have no datas available in db

3.In arabic room details page, both cdn data and arabic description and facilities are shown together..remove the cdn data

- File Screenshot from 2018-07-07 11-51-53.png added

- Status changed from Fixed not Tested to Not Fixed

1.For gta, facilities are not showing in result page facility pop up even if we have english and arabic facilities in db..then once if we go to room details page facilities are showing in both english and arabic..then if use back to results from room details page for that particular hotel, english facilities are shown both in english anda rabic site
2.For hotel beds apitude, english facilities are shown in both result page and room details page..even if we have arabic facilities in db

#13 - 07/08/2018 04:40 am - Nithin George

- Status changed from Not Fixed to Fixed not Tested

gta issue : not an issue

facility Information is taken from the provider side on the details page and is updated to selected hotel session

while return to the previous page the updated hotel detail will be shown

we can't send facility information request on the result page as it causes performance issues

hotel beds apitude issue : not an issue

we have requesting for paid facility information from hotel beds apitude in the result page

The provider will give only English facility response with **paid facility information and points of interest information**

We are updating our DB facility information with provider response
